

# **PRESAGIA** *Occ Health*

## **Software facilitating effective Occupational Health programs**

As health costs rise and the role of the employer in providing health benefits increases, so too does the incentive for employers to adopt strategies that comprehensively address employee health. Presagia Occ Health is an integrated solution consisting of:

- An Electronic Health Record tailored to the occupational health setting
- Incident, Injury and Illness Tracking
- Medical Case Management

Equally effective for employers and occupational health service providers, this web-based solution facilitates integrated, best-practice management of occupational health. With it, customers can enhance their processes and realize significant benefits, including the ability to:

- Integrate data and connect stakeholders within a single, collaborative system
- Provide case managers real-time, centralized access to complete case histories
- Efficiently manage onsite health clinics and rehabilitation centers
- Capture complete, succinct incident, injury and illness data anywhere, anytime
- Link occupational health to other cost saving programs such as return to work
- Leverage 'one button' form generation for reporting (e.g. OSHA reports, audits)
- Utilize decision support tools such as Evidence-based Guidelines
- Build feeds with other systems (e.g. Claims) for seamless data exchange
- Report-on and analyze occupational health across the organization
