Software Solutions to Optimize Athlete Health & Performance

Industry-Leading Technology Solutions for Sports Organizations

For more than two decades, Presagia has offered sports and health organizations worldwide industry-leading data management solutions that provide web-based access to centralized athlete health data anywhere, at anytime.

Total Athlete Health Management

The flexibility of Presagia Sports™ (formerly InjuryZone™) enables sports organizations of all sizes, from Professional Teams and Universities to Olympic Medical Committees and National Sporting Federations, to implement Athlete Health Management solutions tailored to their global requirements. These solutions leverage technology and best-practices to:

- Optimize overall health and performance
- Streamline processes
- Improve healthcare team communication
- Reduce administrative costs

"We are happy that a company was able to put together such a comprehensive injury tracking and health management package. We firmly believe Presagia Sports enables us to provide an unparalleled level of healthcare to the athlete that is second to none."

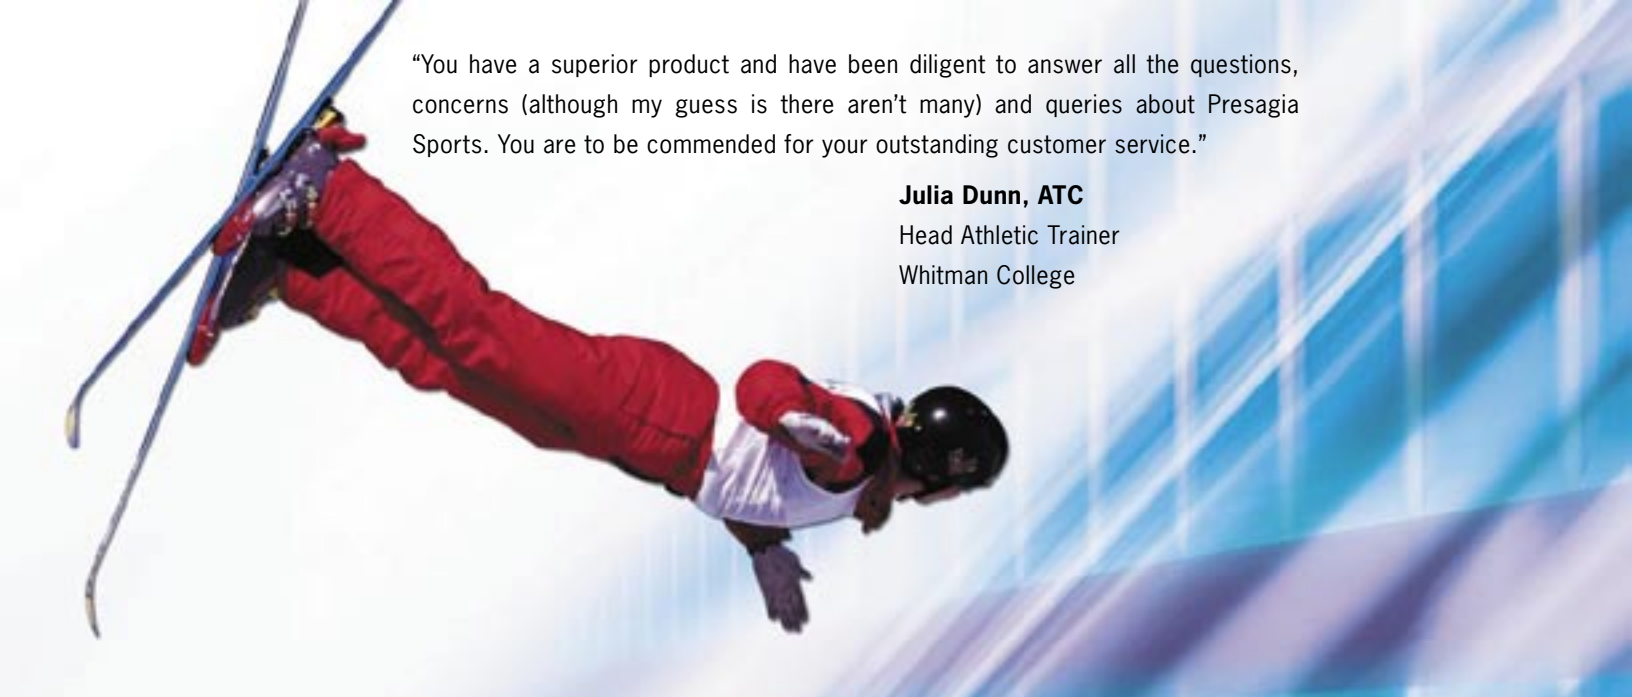

Keith Clements, ATC

Former Head Athletic Trainer of
University of Tennessee

Comprehensive Athlete Electronic Health Record

Presagia Sports™ includes a comprehensive Athlete Electronic Health Record (EHR) that supports high-performance training and competition by capturing complete data relating to the health of athletes across all sports in an organization. Athletic trainers, coaches and medical professionals can easily enter, manage and share important health data across an organization - online or offline, from a desktop, tablet or PDA – and make more informed decisions based on a complete picture of each athlete's current health status. This enhances the treatment planning process as well as reduces the stress on injured athletes by letting them know that their care providers have their complete medical profile in hand.

As well, researchers and epidemiologists gain extensive data-mining capabilities to perform in-depth trend analysis. This allows for the correlation of statistics relating to the cause and effect of incidents and the modification of training techniques to reduce injury rates and improve overall athletic performance.

“You have a superior product and have been diligent to answer all the questions, concerns (although my guess is there aren’t many) and queries about Presagia Sports. You are to be commended for your outstanding customer service.”

Julia Dunn, ATC

Head Athletic Trainer
Whitman College

Secure Communication and Collaboration

Presagia Sports™ facilitates communication among all personnel involved in athlete health management, including coaches, athletic trainers, team physicians and researchers – ensuring the dissemination of critical athlete data in real-time and reducing dependency on paper-based records. The highly portable Presagia EHR connects all medical disciplines together – from orthopedic surgeons to sports psychologists - to enable collaborative decision-making.

As well, the application’s robust security model uses role- and permission-based access, enabling system administrators to control read and write access to athlete records, even down to specific sections of an individual record. This model undergoes continual improvement in order to best protect the confidentiality of sensitive medical information.

▲ **The Healthcare Team**

- ▲ Gains secure anytime, anywhere access via online and offline capabilities
- ▲ Makes more informed treatment decisions with full access to athlete health histories
- ▲ Communicates in real-time via the central workspace to provide more collaborative care

▲ **Researchers**

- ▲ Use data-mining capabilities to filter, export and analyze data - all data can be stripped of personal identifiers
- ▲ Perform in-depth analysis to identify health and performance trends and risks

▲ **Administrators**

- ▲ Replace paper records and charts with efficient electronic filing using an intuitive interface
- ▲ Auto-populate forms and templates to reduce redundant data entry
- ▲ Easily create and share ad-hoc and periodic reports to address organizational needs

Presagia develops innovative software solutions for athletics organizations worldwide. Our user-friendly solutions support cost-effective integration of diverse data, processes and systems to improve communications, streamline workflows and provide real-time information and analytics. The result is strategic, collaborative management that controls health costs and lost-time, and increases overall performance and competitiveness.
